EPro15 (ATU)

Domestic Wastewater Treatment System (AEROBIC TREATMENT UNIT)

Control Cabinet with PLC Unit, Air Blower and Air Solenoids

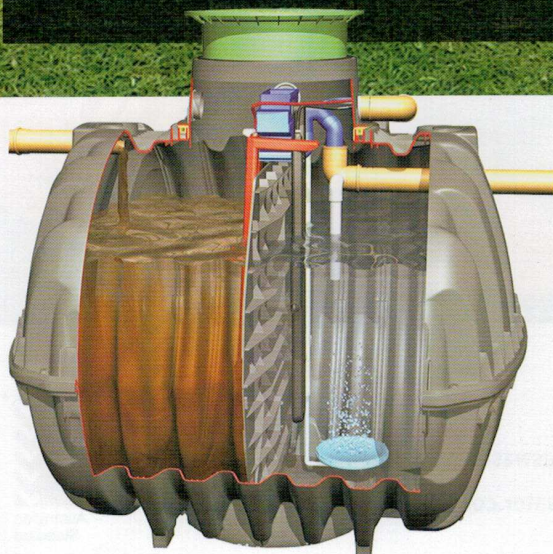

Pump chamber for disinfection and transfer to irrigation.

1. External Control Cabinet
2. GRAF injection moulded 4800L treatment tank - options for Dome/Lid on request
3. GRAF 900L roto moulded disinfection pump chamber

The EPro15 utilises SBR treatment, a proven and efficient technology minimising operation time. The control cabinet can be discreetly positioned in the garden or with an indoor option in a shed

or garage. The high-tech controller comes with various options such as unique cost saving vacation mode and SMS messaging to your Service Agent.
